- Nodes move very slowly — 1° to 2° per century in a clockwise fashion¹²
- The nodal axis point = gateway for transmission of planet's cosmic story
- Heliocentric Planetary Nodes are cosmic amplifiers — intensifying the planetary energy crossing or in aspect to them
- Research confirms: major crises occur when multiple planets simultaneously contact Heliocentric Planetary Nodes.⁵

MAJOR PANDEMICS APPEAR TO REPEAT EVERY 100 YEARS

Diseases continue to alter the course of human history — but what's really driving the timing?
